

## PROFESSIONAL SUMMARY

I am a self-taught Junior Front-End Developer. I have experience developing full-stack applications (MVC architecture, API) following best practices (refactoring, code standards). I have deep foundations in Javascript.

I am a self-teaching individual at the core, passionate, motivated and dedicated to coding.

Started as a digital marketer (google adwords & facebook ads) then worked as a QA in an automation testing team at Checkpoint (Jsystem automation testing framework) and took a 3 months' intensive course to study Javascript and the MEAN/MERN stack to kickstart my new career.

## PROJECTS

[BababoxTV](#) built using Wordpress

[The Home Cook Hackathon project.](#) built using Node, Angularjs and MongoDB

[My Portfolio](#) built using JS/HTML/CSS

## EDUCATION

Intensive Coding Bootcamp – Elevation Academy – 2017 (3months)

Master Degree with honors – Business School – ISG Paris – 2007-2012

Bachelors of Science – Physics with honors – College Yabne Paris – 2007
